

Nursery Tip of the Week

Fertilize

Fertilize Roses - when new growth begins fertilize with Organic 5-6-3 Rose Food. Also start treating for diseases and pests using garlic spray for insects and fungus or Neem Oil which is an insecticide, fungicide and miticide.

Decide

Make Decisions For Your Spring Vegetable Garden - amend garden beds with compost, dried molasses and Organic 6-2-4 Fertilizer to get them ready for planting.

Mulch

Mulch - to help with water retention, place a layer 2-3 inches deep of shredded cedar mulch on an area 1-2 feet out from the base of any newly planted trees and keep the area free of grass and weeds.
